

# Hemispheric Transport of Air Pollution 2010: Part C - Persistent Organic Pollutants (Air Pollution Studies)

The Task Force on Hemispheric Transport of Air Pollution (TF HTAP) was created by the Convention on Long-range Transboundary Air Pollution (LRTAP Convention) in December 2004 to improve the understanding of the intercontinental transport of air pollutants across the Northern Hemisphere. This multivolume assessment produced by the TF HTAP reviews the state-of-the-science with respect to the intercontinental transport of ozone (O<sub>3</sub>), particulate matter (PM), mercury (Hg), and persistent organic pollutants (POPs).
